TC 1700

REASON 2

The invention is unpatentable under Section 29 (2) of the Patent Law, as being such that the invention could easily have been made by a person with ordinary skill in the art to which the invention pertains, on the basis of the invention described in the following distributed publication(s) or made available to the public through electric telecommunication lines in Japan or a foreign country prior to this application.

REMARKS

NOT AVAILABLE

(1) Re: Claim 2

References 1 to 3 are applicable.

Reference 2 describes that samples in a main sample container are dispensed into sub sample containers, and that an identification label is affixed to the sub sample container. References 3 and 4 describe that an available region is detected, and that a chip for dispensing is used.

The present invention could have been made by merely combining the matters described in the references, and can be merely expected from the references.
